SUMMARY

Motivated and detail-oriented Full Stack Developer with strong foundations in MERN Stack. Experienced in building real-world projects with a focus on performance and scalability. Seeking an internship opportunity to apply technical skills and contribute to impactful products.

PROJECTS

Local Clothing Discovery Platform

Tech Stack: React, Node.js, Express, MongoDB

- Built a hyperlocal platform to discover clothing from nearby shops with smart filters (category, price, availability).
- Managed a group of 5 developers and a survey team in collecting local data and consumer interest.
- Developed user and shopkeeper interfaces for browsing, uploading, and managing inventory.
- Designed REST APIs for efficient handling of products and user queries.
- Created a responsive UI to improve user experience and product discoverability.

Sorting Visualizer

Tech Stack: React, JavaScript, HTML, CSS

- Developed an interactive sorting visualizer to demonstrate algorithms like Bubble Sort, Merge Sort, and Quick Sort.
 - Implemented step-by-step animations with adjustable speed control to enhance conceptual understanding.
 - Optimized rendering for smooth, real-time visualization of sorting processes.
 - Designed an intuitive UI to clearly display comparisons and swaps during execution.
